Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: at least 7 embodiments of VTV system are shown in figs. 1-20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no specific claim in the set of claims 1-56 has been considered to be generic to the 7 distinct embodiments.

The inventions are distinct, each from the other because of the following reasons:

For example claim 1 is directed to a television receiver.

Claims 2 and 14 are directed to a television camera producing panoramic pictures.

Claim 7 is directed to an entertainment system with a VCR, a DVD, and a satellite receiver.

Claim 8 is directed to a virtual television.

Claim 22 is directed to an electronic device controlled by a viewer's head.

Claim 39 calls for an electro-optical assembly with video cameras, HDTV cameras, and digital still cameras.

Claims 45-48 are directed to calculating the movement of a camera.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

NOTE: The applicant is advised to review or rewrite all of the elected claims in order to avoid a rejection based upon multiple dependency. For example, claims 3 cannot depend on claims 1 and 2 at the same time. Claim 6 cannot depend upon claims 1 to 5.

Art Unit: 2613

A claim can depend upon either one of claims 1 to 5 but not upon claims 1 to 5 at the same time. The alternative dependency is permissible, while multiple dependency is not.

It is also noted that TABLE 1 of the drawings is not associated with any figure. It is suggested that the applicant either makes the association or renumber the figures in order to solve the problem.

While a restriction is not intended to raise the claim dependency issue, it is the examiner's belief that the applicant might use the above as a guideline to expedite the prosecution.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gims S Philippe whose telephone number is (703) 305-1107. The examiner can normally be reached on M-F (9:30-7:00) Second Monday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris S Kelley can be reached on (703) 305-4780. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
